

Stainless Steel Wall Board Holder, 22mm Diameter, 1/8 in Thickness

- Constructed from high-grade stainless steel for durability
- 22mm (7/8 in) diameter standoff design
- 1/8 in material thickness for added rigidity
- Wall-mount installation suited to offices and classrooms
- Backed by a 1-year warranty

OVERVIEW

The BS-B22 is a wall-mount board holder constructed from high-grade stainless steel with a 22mm diameter and 1/8 in material thickness. It is designed to secure and display boards in commercial and institutional environments, including offices and classrooms, as well as residential applications.

The holder accommodates various board sizes and is engineered for strength and stability. Its minimalist profile is suited to a range of interior settings without requiring specialized installation procedures.
