

Aluminum Board Holder, 20 mm Board Thickness, 100 mm Length, 2 pcs per Bag

- Aluminum construction for low weight and structural strength
- Sized for aluminum boards of 20 mm panel thickness
- 100 mm holding length for distributed clamping support
- Slip-resistant profile limits panel movement in transit
- Packaged two pieces per bag for paired panel mounting
- Backed by a 1-year warranty

OVERVIEW

The BS-G20-100 is an aluminum board holder designed to secure 20 mm thick aluminum boards over a 100 mm holding length. It is intended for use during transportation and storage, providing a stable grip that minimizes board movement and reduces the risk of surface damage. Suitable for contractors and tradespeople handling aluminum board and sign panel assemblies.

Constructed from aluminum, the holder combines low weight with structural durability. The profile incorporates slip-resistant geometry to keep panels firmly in position, and the material selection supports repeated handling cycles. Supplied two pieces per bag.

Covered by a 1-year warranty.
