

Aluminum Board Holder, 12 mm
Material Thickness, 360-Degree
Rotation, Corrosion-Resistant

- Accommodates panel materials up to 12 mm in thickness
- 360-degree rotation for adjustable panel positioning
- Aluminum construction for corrosion resistance and low weight
- Grips held material to limit movement and surface damage
- Covered by a one-year warranty

OVERVIEW

The BS-H12-360 is an aluminum board holder designed to secure materials up to 12 mm in thickness. It is suited for commercial and industrial applications where reliable, adjustable material support is required, including signage mounting and display framing.

Constructed from aluminum, the holder offers corrosion resistance and a lightweight profile while maintaining a sturdy grip on held materials to minimize movement and reduce the risk of surface damage. A 360-degree rotation feature allows repositioning to accommodate varied installation angles and orientations.

The holder is covered by a one-year warranty.
