

Aluminum Board Holder, 12 mm Frame Thickness, 90 Degree Angle, 2 Pieces per Bag

- Aluminum construction for rigidity and corrosion resistance
- Sized for aluminum frame and panel stock of 12 mm thickness
- 90 degree geometry for perpendicular edge and corner mounting
- Supplied two pieces per bag for paired mounting points
- Covered by a manufacturer warranty term of 1 year

OVERVIEW

The BS-H12-90 is an aluminum board holder designed to secure frames and panels of 12 mm thickness at a 90 degree angle. It is intended for commercial displays, art galleries, exhibits and architectural signage installations where a clean, stable frame mount is required.

The holder is machined from aluminum for rigidity and corrosion resistance, and grips the frame edge to prevent movement or displacement. The low-profile geometry integrates with the displayed frame without obstructing the face of the panel. Each bag contains two pieces, supporting paired mounting points on a single frame.

The holder carries a 1-year warranty.
