

Stainless Steel Glass Hinge, 12 mm Glass Thickness, Set of Four, Corrosion Resistant

- Stainless steel construction for corrosion resistance
- Sized specifically for 12 mm glass panel thickness
- Supplied as a set of four matched hinge pieces
- Rated for indoor and outdoor installation environments
- Low-profile body suited to frequent-use glass doors
- Backed by a 1-year warranty

OVERVIEW

The BS-K12 is a stainless steel hinge set designed for 12 mm thick glass panels, supplied as a set of four pieces. It is used on glass doors, enclosures, cabinets, and display cases in residential, commercial, office, and retail environments.

Constructed from stainless steel for corrosion resistance and long service life, the hinge is engineered to clamp 12 mm glass for a secure, stable fit and is rated for both indoor and outdoor installation. The low-profile body is intended for frequent-use openings and presents a clean, contemporary appearance against the glass panel.

Covered by a 1-year warranty.
