

Stainless Steel Hinge Set, 6 - 8 mm Glass Thickness, Mounting Hardware, 1 - Year Warranty

- Stainless steel construction for strength and corrosion resistance
- Sized for glass panel thickness of 6 to 8 mm
- Safety features included to promote panel stability
- Smooth - operating hinge action across the swing range
- Backed by a 1 - year warranty

OVERVIEW

A stainless steel hinge set sized for glass panels with a thickness of 6 to 8 mm. It serves as mounting hardware for glass doors, partitions and display panels in residential and commercial installations where glass hardware must hold alignment over long service intervals.

The hinge body is constructed from stainless steel for strength and corrosion resistance. The design supports smooth operation through the swing range and incorporates safety features intended to promote stability and reduce the risk of accidental displacement of the panel.

Covered by a 1 - year warranty.
