

Stainless Steel Glass Hinge, 5 - 8 mm
Glass Thickness, Polished Finish, Set of
4

- Stainless steel construction with a polished finish
- Adjustable clamping range for 5 to 8 mm glass thickness
- Corrosion-resistant for humid shower and washroom environments
- Smooth-operating mechanism for stable glass panel support
- Packaged as a set of four hinges
- Backed by a one-year warranty

OVERVIEW

The BS-K8 is a stainless steel glass hinge designed to accommodate glass thicknesses from 5 to 8mm. It is suited for commercial and residential applications including shower doors, display cabinets, and shelving units, making it a practical hardware solution for architects, interior designers, and contractors.

Constructed from stainless steel with a polished finish, the hinge offers corrosion resistance and durability in demanding environments. It adjusts to fit varying glass thicknesses within the specified range, providing a secure and stable connection. The smooth operating mechanism supports consistent performance with minimal maintenance requirements.

Supplied as a set of four pieces and covered by a one-year warranty.
