

Round Steel Wire Top Fixer for Light Box, 21mm

OVERVIEW

The BS-W-A01L is a round steel wire top fixer designed for securing light box frames. It mounts to the top of a light box using screws, providing a fixed attachment point for wire suspension or structural support. The 21mm diameter round profile is suited for standard light box hardware installations in commercial signage applications.

Constructed from steel, the fixer is intended to provide stable, long-term mechanical support for suspended or wall-mounted light boxes. The round form factor and screw-mount installation method allow for straightforward integration into existing light box frame assemblies without specialized tooling.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should verify suitability for their specific installation requirements and applicable local codes prior to procurement.
