

Stainless Steel Wire System Holder,
42mm Base, 33mm Length, 2-Pack

- Stainless steel construction resists corrosion
- 42mm base length for stable mounting
- 33mm overall length for compact installation
- Sold as 2 pieces per bag
- Accommodates various wire sizes
- Backed by a 1-year warranty

OVERVIEW

The BS-W-A07 is a stainless steel wire system holder designed for securing and organizing wiring in commercial and residential sign installations. With a 42mm base length for stable mounting and a 33mm overall length, it suits confined spaces requiring a compact, low-profile fastening solution.

Constructed from stainless steel, the holder provides corrosion resistance and durability under typical installation conditions. Its design accommodates various wire sizes, making it adaptable across wire management applications, and it is supplied 2 pieces per bag.

The holder carries a 1-year warranty.
