

Stainless Steel Double - Ended Board Support System, Corrosion Resistant, 4 Pieces per Bag

- Stainless steel construction for corrosion resistance
- Double-ended design clamps panels from both edges
- Supplied four pieces per bag for multi-point board support
- Accommodates a range of board sizes and thicknesses
- Covered by a one-year manufacturer warranty

OVERVIEW

The BS-W-A08 is a stainless steel support system designed for double-ended boards, suitable for display boards, signage, and shelving unit applications in commercial and industrial environments. The system is constructed from stainless steel, providing corrosion resistance and structural integrity across a range of installation conditions.

The system accommodates varying board sizes and thicknesses, offering flexibility for different project requirements. Its design prioritizes stability and load-bearing reliability, and the installation process is engineered for efficiency. Each bag contains four supports.

The system is covered by a one-year warranty.
