

Wire Hanging Fixer, 12 mm x 15 mm, Iron Body with Stainless Steel Finish

- Compact 12 mm x 15 mm body for tight mounting locations
- Top-grade iron construction for mechanical durability
- Stainless steel finish for a consistent exposed appearance
- Secures stainless steel suspension wire in hanging assemblies
- Backed by a 1-year warranty

OVERVIEW

The Stainless Steel Wire Fixer is a compact fastening component for wire hanging systems, used to secure stainless steel suspension wire in signage, display and general wire management assemblies. Its small footprint suits confined mounting locations and in-line use within a larger cable run.

The body measures 12 mm x 15 mm and is constructed from top-grade iron with a stainless steel finish, providing mechanical durability and a consistent appearance on exposed installations.

Supplied with a 1-year warranty.
