

Stainless Steel Wire System Board Holder,
One-Sided, 28mm Length, 10mm Opening

- Stainless steel construction resists corrosion and mechanical stress
- 28mm overall holder length suits a range of panel sizes
- 10mm board opening width provides a snug retention fit
- One-sided configuration for single-wire suspension mounting
- Covered by a one-year manufacturer warranty

OVERVIEW

The BS-W-A49H is a stainless steel wire system board holder designed to secure sign panels and circuit boards in fixed positions within industrial and commercial installations. With a 28mm length and a 10mm board opening width, it provides a snug, stable fit across a range of board thicknesses, preventing movement or displacement during operation.

Constructed from stainless steel, the holder offers resistance to corrosion and mechanical stress, making it suitable for demanding environments where long-term reliability is required. The one-sided configuration mounts to a single suspension wire for straightforward panel retention.

The holder is covered by a one-year warranty.

SPECIFICATIONS

OPTICAL

LED Lifetime 50,000 h

MECHANICAL

Product Dimensions 28 mm length, 10 mm board opening width

Material Stainless steel

Mounting Wire suspension system, one-sided

ORDERING

Warranty 1 y

APPLICATIONS

- Suspended retail sign panels
- Cable-supported display systems
- Industrial and commercial signage
- Interior wayfinding panel mounting
- Trade show and exhibit graphics
