

Stainless Steel Board Holder, 14mm Dia x 30mm Height, 6mm Slot Opening, 4-Pack

OVERVIEW

The BS-W-A52 Stainless Steel Board Holder is a mounting accessory designed to secure and organize boards in commercial and professional environments. With a 14mm diameter body and 30mm height, it provides a stable base for board placement. The 6mm slot opening accommodates standard board thicknesses, allowing straightforward insertion and removal without tools. Each pack contains four holders.

Constructed from stainless steel, the holder offers inherent resistance to corrosion, making it suitable for use in environments where moisture or humidity may be a concern. The material also provides structural rigidity to prevent board movement or displacement once seated in the slot.

No certifications, compliance listings, or warranty terms are confirmed in the available source documentation for this product. Contractors and specifiers should contact Poli LED & Signs directly for any project-specific compliance requirements before procurement.
