

Stainless Steel Wire Hanging System, 2mm Diameter, 30m Roll

- Stainless steel construction resists corrosion in indoor and outdoor settings
- 2mm wire diameter suited for sign and panel suspension tasks
- Supplied in a continuous 30-meter roll for long uninterrupted runs
- Backed by a 1-year warranty

OVERVIEW

The BS-Wire2 is a 2mm diameter stainless steel wire supplied in 30-meter rolls, intended for use in commercial and industrial sign mounting, cable management, and suspension applications. Its stainless steel construction provides inherent resistance to corrosion, making it suitable for both interior and exterior installations. The wire is packaged as a continuous roll, allowing installers to cut lengths as needed for hanging signage, panels, or display elements without splicing multiple shorter sections.
