

5 - Channel Onboard Timer Controller, 12V DC / 240W

- 5 independent channels for simultaneous time-based control
- Operates at 12V DC input voltage
- Rated for 240W total power output
- User-programmable time intervals per channel
- 1-year warranty coverage

OVERVIEW

The C-5-240-Timer is a 5-channel onboard programmable timer controller designed to manage time-based switching operations across multiple independent channels simultaneously. It is suited for both industrial and residential applications, including factory automation and facility lighting control.

The controller operates at 12V DC and supports a total power output of 240W, allowing it to drive heavy-duty equipment loads. Each channel can be programmed with individual time intervals through a user-friendly interface, enabling precise scheduling and straightforward on-site adjustment.

SPECIFICATIONS

OPTICAL

LED Lifetime 50,000 h

ELECTRICAL

Operating Voltage 12 V

Wattage 240 W

ORDERING

Warranty 1 y

APPLICATIONS

- Factory automation control panels
- Facility lighting scheduling
- Residential heavy-duty equipment timing
- Industrial process switching
