

4-Zone RGBW Wireless Remote Control, 2.4GHz, 4-Channel, IP20

OVERVIEW

The C-5IN1-RC-3-4 is a 4-zone RGBW wireless remote control designed for use with compatible Mi-Light and MiBoxer RGBW lighting controllers. Operating on the 2.4GHz frequency with GFSK modulation, it supports up to four independently addressable zones and allows full-range control of color, color temperature, saturation, and brightness. It is suited for commercial and residential lighting control applications where grouped zone management is required.

The remote features a high-precision capacitive touch interface for stable and responsive input. Its 2.4GHz signal provides long-range transmission with strong interference resistance. The unit is rated IP20, making it appropriate for dry indoor environments only. Constructed of plastic, it measures approximately 5 x 2 x 1 inches and weighs 0.2 lb. One remote can be paired with an unlimited number of fixtures or controllers, while each fixture accepts pairing with up to four remotes.

No certifications have been confirmed in the available source documentation. Contractors and specifiers should verify compliance requirements independently before installation. No warranty terms are stated in the available product data.
