

## 4-Zone Panel Remote for RGB+CCT Lighting, 2.4 GHz RF, 30 m Range

### OVERVIEW

The C-5IN1-WP-RGBCCT-4 is a 4-zone panel remote designed to control RGB+CCT lighting systems via 2.4 GHz RF wireless transmission. Compatible with MiBoxer/Mi-Light 2.4G series fixtures, it supports independent zone control with adjustable brightness, color temperature, and saturation across 16 million color options. The capacitive touch interface and magnetic installation simplify both operation and mounting.

The remote operates on 2x AAA batteries at 3V DC with a 20  $\mu$ A standby current draw and 6 dBm transmitting power. RF transmission uses GFSK modulation across the 2400–2483.5 MHz band with a rated control distance of 30 m. Operating temperature range is -10°C to 40°C.

No certifications are confirmed in the available source data. Consult your Poli LED & Signs representative for compliance documentation relevant to your project requirements.
