

4-Zone RGB+CCT 2.4GHz Wireless Remote Control, 30 m Range, 3V

OVERVIEW

The C-5IN1-WPR-RGBCCT-4 is a 4-zone RGB+CCT 2.4GHz wireless remote control designed for use with MiBoxer/Mi-Light 2.4G compatible lighting systems. It is intended for contractors and property managers who require independent zone control across multiple luminaire groups within a single installation.

The remote operates on 3V (2x AAA batteries) with a standby current draw of 20µA and a transmitting power of 6dBm. It provides a control range of up to 30m and supports four independently addressable zones. Adjustable parameters include brightness, color temperature, saturation, and full RGB color selection across 16 million colors. The unit is rated for operating temperatures from -10°C to 40°C and includes a magnetic base holder for fixed mounting with easy removal.

No certifications are confirmed in the available source data. Consult your Poli LED & Signs representative for compliance documentation applicable to your project requirements.

SPECIFICATIONS

Input voltage	3V DC (2x AAA battery)	Operating temp	-10 to 40 °C
