

## 0-10V Wall Panel LED Dimmer Switch, 300W LED/CFL, 600W Incandescent, 3-Way

### OVERVIEW

The C-PAC-10V-300-3 is a single-pole and 3-way 0-10V wall panel dimmer switch designed for commercial and residential lighting control applications. It accommodates dimmable LED and CFL loads up to 150W, and incandescent or halogen loads up to 600W, operating across a wide voltage range of 110V–277VAC at 50–60Hz. No neutral wire is required, simplifying installation in standard switch boxes.

The dimmer features a large paddle switch for on/off control and a smooth vertical slider for dimming adjustment. The thermoplastic enclosure carries a UL 94 V0 flame rating, and the unit is rated for a switching life of 40,000 cycles. Operating temperature range is -20°C to 60°C, making it suitable for a variety of indoor commercial environments. Wiring is compatible with 18 AWG conductors.

This dimmer is cETLus Listed to UL 1472 and CSA C22.2 No. 184.1-15, confirming compliance with U.S. and Canadian safety standards. A 1-year limited warranty is included.
