

Touch Sensor Controller, Black Wood Finish, Up to 5 cm Detection Range

- Touch-activated sensor for lighting control switching
- Detection range up to 5 cm for proximity activation
- Black wood-finish housing for low-profile aesthetics
- Suited to surface-mounted commercial and residential installs

OVERVIEW

The C-SEN-W-BK is a black wood-finish touch sensor controller designed for lighting control applications requiring a discreet, surface-mounted switching solution. Its tactile interface suits commercial and residential fixture installations where traditional toggle switches are not preferred.

The sensor provides a detection range of up to 5 cm, enabling reliable touch or proximity activation without direct contact. The black wood-finish housing offers a low-profile appearance compatible with modern millwork and panel installations.
