

5 - Gang Wall Plate, Bronze with Patina Finish, Brass, UL Listed, 120V

- 5-gang configuration for multi-device wall installations
- Rated for 120V, 15A circuits
- Brass construction for durability over polymer plates
- IP20 rated for indoor, non-waterproof use
- Bronze with patina decorative finish
- UL listed, 1-year warranty

OVERVIEW

The C-VTG-BP-5-G-G-G-G-G is a 5-gang wall plate finished in bronze with patina, designed for multi-device switch and outlet configurations in residential and light commercial installations. Five identical openings accommodate standard toggle switches, decorator switches or receptacles arranged side by side. The decorative finish suits period-appropriate or upscale interior applications where standard white or almond plates are not appropriate.

Constructed from brass, this wall plate provides a durable metal alternative to polymer cover plates, offering greater resistance to warping and impact in high-use locations. It is rated for 120V, 15A circuits with an IP20 environmental rating for indoor, non-waterproof use.

The product is UL listed and carries a 1-year warranty.

SPECIFICATIONS

OPTICAL

LED Lifetime	50,000 h
--------------	----------
