

## Vintage Brass Rotary Dimmer Switch, 120V AC, IP20, UL Listed

### OVERVIEW

The C-VTG-DI-SB is a single-gang rotary dimmer switch designed for 120V AC residential and light commercial installations. The handcrafted satin brass plate provides a vintage aesthetic suited for decorative interior environments where period-appropriate hardware is specified. Note that as a handmade brass panel, minor chromatic variation between units is inherent to the manufacturing process.

The dimmer operates on a Triac/leading-edge dimming protocol and is rated for use in non-waterproof, indoor environments (IP20). The unit is housed in a brass faceplate measuring 72 x 120 mm with a hole spacing of 83.5 mm, and carries a rated service life of 50,000 hours. A one-year warranty is included.

This product is UL listed under file number E511941. It is not rated for wet or damp locations and should be installed in accordance with applicable NEC requirements for indoor dimmer applications.
