

Satin Brass 5 - Gang Wall Plate with One Decorator, Three GFCI and One Switch Opening, 120V 15A, UL Listed

- One decorator, three GFCI, and one switch opening in a 5-gang layout
- Satin brass finish over brass construction
- Rated for 120V, 15A residential circuits
- IP20 rated for non-waterproof, indoor installation
- UL listed for compliance verification
- Backed by a 1-year warranty

OVERVIEW

The C-VTG-SB-5-D-G-G-G-S is a satin brass 5-gang wall plate configured with one decorator opening, three GFCI openings, and one switch opening. It is intended for residential supply installations where a single cover plate must accommodate a mixed layout of receptacles and switches.

Constructed from brass with a satin finish, the plate is rated for 120V, 15A circuits and carries an IP20 environmental rating for non-waterproof, indoor use. The 5-gang layout consolidates multiple device types into one finished cover, reducing the number of separate plates needed in high-density wiring locations.

The plate is UL listed and backed by a 1-year warranty.

SPECIFICATIONS

OPTICAL
