

5 - Gang Satin Brass Wall Plate, GFCI, Switch and Triple Toggle Openings, 120V/15A, UL Listed

- 5 - gang configuration with one GFCI, one switch and three toggle openings
 - Satin brass finish for coordinated residential and commercial interiors
- Rated for 120V circuits at 15A current draw
 - Brass construction for durability in interior settings
 - IP20 rated for non - waterproof, indoor environments
 - UL listed and backed by a 1 - year warranty

OVERVIEW

The C-VTG-SB-5-G-S-T-T-T is a 5 - gang wall plate finished in satin brass, configured with one GFCI opening, one standard switch opening and three toggle switch openings. It is intended for residential supply applications where multiple device types are consolidated into a single multi - gang assembly, such as entryways or utility walls requiring combined switching and receptacle access. The plate is rated for 120V/15A circuits and constructed from brass, providing a non - waterproof, IP20 indoor - rated enclosure suited to interior installations. It is UL listed and carries a 1 - year warranty.
