

## 2-Gang Vintage Brass Toggle Switch, 3-Way, 120V AC, IP20

### OVERVIEW

The C-VTG-SW2-AB is a 2-gang vintage brass toggle switch designed for 120V AC residential and light commercial wiring applications. The handcrafted brass construction gives each unit a distinctive aged finish; note that minor chromatic variation between units is inherent to the manufacturing process. The switch mounts to a standard 120x120mm plate with an 83.5mm hole spacing, accommodating two independent circuits in a single location.

The switch is rated for 120V AC operation and carries a 50,000-hour rated life. The IP20 environmental rating indicates suitability for dry, indoor installations only; the unit is not rated for wet or damp locations. The brass plate material provides both structural durability and the characteristic vintage aesthetic suited to hospitality, boutique retail, and period-style renovation projects.

A 1-year manufacturer warranty applies to this product. UL certification is referenced in the source documentation under file number E313169; specifiers should verify current listing status directly with UL prior to final specification. No additional certifications are confirmed in the available source data.

### SPECIFICATIONS

<b>IP rating</b>	IP20	<b>Warranty</b>	1 years
<b>Input voltage</b>	120 V	<b>Weight</b>	0.5
<b>Rated life</b>	50000 hours	<b>Dimensions</b>	72x120mm / 120x120mm
