

2-Gang Brass Toggle Switch, 3-Way, 120V AC, 150W Per Switch, IP20

OVERVIEW

The C-VTG-SW2-BG is a 2-gang vintage brass toggle switch plate designed for residential and light commercial wiring applications. Finished in black and gold, the handcrafted brass panel suits retrofit and new-construction projects where period-appropriate aesthetics are required alongside standard North American electrical infrastructure. The 120 x 120 mm faceplate mounts to a standard 2-gang box with an 83.5 mm hole spacing.

The switch operates at 120V AC and carries an IP20 environmental rating, making it suitable for dry indoor locations only. The brass construction provides durability consistent with a rated service life of 50,000 hours. Note that as a handmade panel, minor chromatic variation between units is inherent to the manufacturing process and should be expected when ordering multiple pieces.

The UL certification number referenced in the source data is E313169. Warranty coverage is one year from date of purchase. Installers should verify local code compliance for toggle switch applications prior to installation, particularly in jurisdictions with specific requirements for device finish or gang configuration.

SPECIFICATIONS

IP rating	IP20	Warranty	1 years
Input voltage	120 V	Dimensions	72x120mm / 120x120mm mm
Rated life	50000 hours	Weight	0.5 lb

DIMENSION

Rated Life	50000
Rated Life UOM	Hours
