

3-Gang Brass Toggle Switch, 3-Way, 150W Per Switch, 120V AC

OVERVIEW

The C-VTG-SW3-BG is a 3-gang vintage brass toggle switch plate designed for residential and light commercial wiring applications requiring a traditional aesthetic. Constructed from handcrafted brass with a black and gold finish, this switch accommodates three independent circuits in a single 165×120mm wall plate format with an 83.5mm hole spacing.

Each switch operates at 120V AC and carries a rated service life of 50,000 hours. The unit is rated IP20, suitable for dry indoor environments only and not intended for wet or damp locations. Note that as a handmade brass panel, minor chromatic variation between units is inherent to the manufacturing process and should be expected.

This product carries a UL listing (file E313169) and is backed by a 1-year manufacturer warranty. Installation should comply with applicable NEC requirements for the intended circuit load and gang configuration.
