

4-Gang Toggle Switch, Vintage Brass, 120V AC, 150W Per Switch, 3-Way

OVERVIEW

The C-VTG-SW4-BG is a 4-gang vintage brass toggle switch plate designed for 120V AC residential and light commercial wiring applications. The handcrafted brass construction provides a period-appropriate aesthetic suited for hospitality, boutique retail, and high-end renovation projects where standard decorator switches are not appropriate. Note that as a handmade panel, minor chromatic variation between units is inherent to the product.

Each switch position is rated for 120V AC operation with a non-waterproof environmental rating of IP20, making this product suitable for dry interior locations only. The switch mechanism is rated for 50,000 hours of operational life. The overall panel dimensions are 210 x 120mm with a hole spacing of 83.5mm, compatible with standard multi-gang rough-in configurations.

This product carries a UL listing (file E313169) and is backed by a 1-year manufacturer warranty. Installation must comply with applicable NEC requirements for the rated voltage and environment. This switch is not rated for wet or damp locations and should not be installed in areas subject to moisture exposure.

SPECIFICATIONS

IP rating	IP20	Rated life	50000 hours
