

4 - Gang Wall Plate with Two Duplex Openings, GFCI and Toggle Cutouts, 120V/15A, White Brass

- Four-gang configuration with two duplex, one GFCI, and one toggle opening
- Brass construction with a white finish for a coordinated wall appearance
- Rated for 120V service at 15A for standard residential circuits
- IP20 rated for indoor dry-location, non-waterproof installations
- UL listed for compliance verification
- Backed by a 1-year manufacturer warranty

OVERVIEW

The C-VTG-WB-4-D-D-G-T is a white brass 4-gang combination wall plate configured with two duplex openings, one GFCI cutout, and one toggle switch opening in a single assembly. It is suited for residential supply applications where multiple device types must be grouped at a single location, reducing the need for separate cover plates and maintaining a unified appearance on the wall surface.

Constructed from brass with a white finish, the plate is rated for 120V service at 15A and carries an IP20 rating, indicating suitability for standard indoor dry-location installations classified as non-waterproof.

The assembly is UL listed and backed by a 1-year warranty.
