

LED Lamp Test Light Cord with Clip, 2-Pole, 1.15 m (3.75 ft) Cable, Switched

- 1.15 m (3.75 ft) cord length for bench or in-fixture testing
- Flame-retardant body with copper wire conductors
- Inline switch with power indicator for live-circuit confirmation
- Sprung clip for secure temporary lamp connection
- Rated LED service life of 50,000 hours
- One-year warranty on the cord assembly

OVERVIEW

The CA-Test is a 2-pole LED lamp test light cord used for accurate testing of LED lamps in professional and trade applications. The cord measures 1.15 meters (3.75 ft) and features a sturdy clip for secure attachment, supporting temporary connections during lamp burn-in, switch checks and general electrical testing.

Construction combines flame-retardant material with copper wire conductors, and an inline switch with power indicator confirms live status at a glance. The white cord assembly ships at 6 × 3 × 2 in and 1 lb, remaining compact and lightweight for handling on the job site or at a shop bench. Rated LED service life is 50,000 hours.

The assembly is covered by a one-year warranty.
