

16 AWG 2-Conductor Red/Black Wire, UL2468, 300V, 100 ft Roll

OVERVIEW

The CA2-16-100 is a 16 AWG, 2-conductor parallel wire supplied on a 100 ft (30.5 m) roll. Conductors are color-coded red and black for polarity identification, making it suitable for low-voltage DC wiring applications in LED lighting installations, control runs, and general-purpose power distribution where a 300V-rated parallel cable is required.

The cable is constructed with stranded copper conductors (26/0.24TS configuration) and PVC insulation, with an overall jacket profile of 2.4 x 4.8 mm. It carries a rated voltage of 300V and a rated temperature of 80°C, consistent with UL2468 parallel cable standards.

No certifications have been confirmed in the available source data for this SKU. Contractors should verify compliance requirements against applicable local codes prior to installation.

SPECIFICATIONS

Input voltage	300 V	IP rating	IP44
Operating temp	80 °C
