

## 18 AWG Clear Speaker Wire, 34/0.16TS Stranded, 300V, 50 ft Roll

### OVERVIEW

The CA2-18Clear-50 is an 18 AWG clear-jacketed speaker wire supplied on a 50 ft roll, suited for audio distribution in commercial installations, event spaces, and professional audio environments. The conductor is constructed with 34/0.16TS tinned stranded copper, providing reliable conductivity and flexibility for fixed or semi-permanent wiring runs.

The wire is rated at 300V and 80°C, with a nominal finished outer dimension of  $2.1 \pm 0.10 \times 4.2 \pm 0.15$  mm and a conductor resistance of  $30 \text{ } \Omega / 1000 \text{ ft}$ . Insulation is PVC and meets a dielectric test of 2000V AC. The tinned copper stranding resists oxidation and supports consistent long-term signal integrity.

This wire is manufactured in compliance with RoHS 1.0 (6-substance) environmental standards.
