

18 AWG 2-Conductor Red/Black Speaker Wire, UL2468, 967 ft Roll on Reel

- 18 AWG 2-conductor construction for speaker wiring applications
- 34 strands of 0.16TS copper per conductor for flexibility and conductivity
- Meets UL2468 wire construction standards
- 967 ft (295 m) roll length supplied on a reel
- Red/black jacket coding for polarity identification

OVERVIEW

The CA2-18RB is an 18 AWG 2-conductor red/black speaker wire designed for audio signal distribution in residential, commercial, and professional installations. It is supplied on a reel in 967 ft (295 m) rolls, providing a manageable format for larger runs and organized storage.

The conductor is built with 34 strands of 0.16 copper, supporting reliable signal transfer and flexibility during installation. The red/black jacket coding simplifies polarity identification across long runs. The wire meets UL2468 construction standards.

SPECIFICATIONS

OPTICAL

LED Lifetime 50,000 h

ELECTRICAL

Wire Gauge 18 AWG

MECHANICAL

Length 295 m
967.8 ft

Material Copper

ORDERING

Warranty 1 y

APPLICATIONS

- Residential audio system wiring
- Commercial sound system installation
- Professional AV integration
- In-wall speaker wire runs
