

20 AWG 2-Conductor Red/Black Speaker Wire, UL2468, 300V, 100 ft Roll

OVERVIEW

The CA2-20RB-100 is a 20 AWG 2-conductor speaker wire supplied in 100 ft rolls with red and black color-coded insulation for straightforward polarity identification. It is suited for speaker wiring in commercial and residential installations where a reliable, flexible, and compact cable run is required.

The wire is rated at 300V and 80°C. The 20 AWG conductors use tinned stranded copper construction. Insulation is PVC and meets a minimum tensile strength of 10.3 MPa with a minimum elongation of 100% (unaged). The flat 2468-series profile measures approximately 1.8 ±0.10 mm × 3.6 ±0.15 mm overall.

The wire conforms to the UL2468 standard and complies with RoHS 1.0 (6-substance) environmental requirements.
