

## 16 AWG 2-Conductor Cable, 300V PVC Jacket, 100 ft Roll

### OVERVIEW

The CA2J-16-100 is a UL2464-rated 16 AWG 2-conductor cable supplied in 100 ft (30.5 m) rolls, priced per foot. It is suited for general wiring applications in commercial and light industrial environments where a flexible, multi-conductor cable with a durable outer jacket is required.

The cable features stranded copper conductors with a cross-sectional area of 1.31 mm<sup>2</sup> (26 strands at 0.254 mm), individual PVC insulation in red and black at 2.2 mm diameter, and a black PVC outer jacket with an overall diameter of 6.2 ± 0.15 mm. It is rated for 300V and 80°C continuous operating temperature.

This cable complies with RoHS environmental standards. No additional certifications are confirmed in available documentation.

### SPECIFICATIONS

<b>Input voltage</b>	300 V	<b>Dimensions</b>	6.2 ± 0.15 mm OD mm
<b>Operating temp</b>	80 °C	<b>Roll length</b>	30.5 m
