

20 AWG 4-Wire PVC-Jacketed Cable,
660 ft (200 m) Roll

- 20 AWG conductor size for precise wiring applications
- 4-conductor configuration supports multiple circuits in one cable
- PVC jacket resists physical damage and moisture ingress
- Supplied in 660 ft (200 m) rolls for large-scale installations
- 1-year warranty coverage

OVERVIEW

The CA4J-20 is a 20 AWG, 4-conductor PVC-jacketed cable supplied in 660 ft (200 m) rolls for electrical wiring applications in commercial and industrial environments.

The PVC jacket protects against physical damage and moisture, and the 4-conductor configuration supports multi-wire runs where discrete circuits or signal paths are required within a single cable assembly.

The cable carries a 1-year warranty.
