

14 AWG 2-Conductor Red/Black Wire, PVC Jacket, 300V, UL2464, 20 ft Roll

OVERVIEW

The CAJ2-14-20 is a 14 AWG, 2-conductor stranded copper wire supplied on a 20 ft roll. Conductors are color-coded red and black with a black PVC outer jacket, making it suitable for low-voltage power distribution, LED driver wiring, sign cabinet runs, and general commercial electrical applications requiring a multi-conductor flexible cable.

The cable is rated for 300V and 80°C, with a 41/0.24TS stranded copper construction providing a nominal cross-sectional area of 1.85 mm² per conductor. The overall jacket diameter is 8.0 mm. Both insulation and jacket are PVC, offering adequate resistance to abrasion and moisture in typical indoor and protected outdoor installations. The cable conforms to the UL2464 standard.

No certifications have been confirmed in the available source documentation. Contractors should verify local code compliance and suitability for the intended installation environment prior to use.

SPECIFICATIONS

Input voltage	300 V	Operating temp	80 °C
IP rating	IP44
