

14 AWG 2-Conductor Red/Black Wire with PVC Jacket, UL2464, 50 ft Roll

OVERVIEW

The CAJ2-14-50 is a 14 AWG, 2-conductor stranded copper wire supplied on a 50 ft (15.5 m) roll. Conductors are color-coded red and black with individual PVC insulation and an overall black PVC jacket, making it suitable for commercial and industrial wiring applications including LED driver connections, control circuits, and general low-voltage power distribution.

The cable is rated for 300V and 80°C, with a 41/0.24TS stranded copper construction providing a sectional area of 1.85 mm² per conductor. The overall jacket diameter is 8.0 mm. PVC insulation and jacketing provide resistance to abrasion and moisture in standard indoor and protected outdoor installations.

No certifications have been confirmed in the available source documentation for this SKU. Installers should verify local code compliance before specifying for regulated applications.

SPECIFICATIONS

Input voltage	300 V	Dimensions	8.0mm overall diameter (14 AWG) mm
IP rating	IP44
