

Cutting Vinyl Blade for Anagraph 45 Machines, 45-Degree, Locking Mechanism

- Designed for direct compatibility with the Anagraph 45 cutting machine
- 45-degree blade angle for precise vinyl cutting
- Secure locking mechanism for safe blade operation
- Ergonomic handle design for operator comfort during use
- Backed by a 1-year warranty
- Rated for 50,000 hours of use

OVERVIEW

The CB-ANAGRAPH-45 is a cutting blade designed specifically for use with the Anagraph 45 machine, intended for precise vinyl cutting applications in sign-making and graphics production environments. The 45-degree blade angle supports clean, accurate cuts on vinyl materials used in signage and graphics work.

The blade features a secure locking mechanism for safe operation during use and an ergonomic handle design to support operator comfort during extended cutting sessions. It is built for durable, long-lasting sharpness suitable for professional-grade output and integrates directly with the Anagraph 45 machine for compatibility.

The product is backed by a 1-year warranty.
