

Cutting Vinyl Blade for Anagraph Cutters, 60-Degree, Signage Grade

- 60-degree blade angle for precision vinyl cutting
- Compatible with Anagraph vinyl cutting machines
- Backed by a 1-year manufacturer warranty
- Rated for 50,000 hours of service life
- Designed for durability in repeated production cutting cycles

OVERVIEW

The CB-ANAGRAPH-60 is a 60-degree cutting blade designed for use with Anagraph vinyl cutters, suited for professional signage and graphic design applications. It is intended for cutting vinyl materials with precision, making it appropriate for intricate designs and detailed work in commercial sign production.

The blade is constructed for durability and extended service life, reducing replacement frequency in production environments. Its design supports accurate cuts and consistent performance across typical vinyl cutting tasks.

The blade carries a 1-year warranty, supporting reliable use in commercial signage operations.
