

Graphtec Cutting Vinyl Blade 60-Degree Thin Profile (09 Series)

- 60-degree thin profile blade for detailed vinyl cutting
- Compatible with Graphtec vinyl cutters and cutting plotters
- Suited for signage, decals, heat transfers, and vehicle wraps
- Securely retained in the plotter during operation
- Rated service life of 50,000 hours
- Backed by a 1-year warranty

OVERVIEW

The Graphtec 2 (09) 60-degree cutting blade is designed for use with Graphtec vinyl cutters and compatible cutting plotters. It is suited for signage, decals, heat transfers, and vehicle wraps, with a thin profile intended to support intricate and detailed cuts on vinyl materials.

The blade is constructed for durability and extended service life, reducing replacement frequency. Its design keeps it securely retained in the cutting plotter during operation, supporting consistent, repeatable results across production runs.

The blade carries a 1-year warranty and a rated service life of 50,000 hours.
