

Dimmer Switch, Manual Control, Night Black Finish

- Night Black finish coordinates with dark wall plates and trim
- Manual dimmer control for adjustable light output
- Intended for night lighting and low-level illumination use
- Functions as a switch replacement for dimmable circuits

OVERVIEW

The D-BK is a manual dimmer switch finished in night black, intended for controlling light output in low-level or nighttime lighting applications. It is installed in place of a standard switch to allow adjustable illumination rather than fixed on/off control. The unit provides manual light level adjustment, allowing the operator to set brightness to suit ambient conditions such as hallways, stairwells, or accent lighting zones where dimmed output is preferred over full brightness.
