

Stripped Brass Dimmer Switch, Vintage Hardware Finish

- Stripped brass finish for a vintage hardware appearance
- Dimmer switch configuration for lighting control
- Metal construction suited to durable control device use
- Finish suited to residential and commercial installations

OVERVIEW

The Stripped Brass Dimmer is a dimmer switch finished in stripped brass, intended for lighting control applications where a traditional metal finish is specified. It suits commercial and residential installations calling for a durable, corrosion-resistant control device with a classic aesthetic.

The stripped brass finish provides a distinct vintage appearance suited to period-style electrical hardware and decorative switch plate assemblies.
