

## Double Wire Quick Connector, 300V 8A, 0.35–0.75mm<sup>2</sup> Cable Range

### OVERVIEW

The E-CON-2-W is a two-conductor quick-connect wire connector designed for fast, tool-free splicing in LED lighting installations, control wiring, and general low-voltage electrical assemblies. It accepts conductors in the 0.35–0.75mm<sup>2</sup> range and is suited for applications requiring a compact, reliable termination point.

Rated at 300V and 8A, the connector accommodates cable outer diameters from 1.5mm to 2.1mm. The insulating body is constructed from PC UL94-V0 flame-retardant material, and the contact conductor is high-precision brass with copper conductors. Operating temperature range is -20°C to +105°C. Sold in bags of 5 pcs.
