

Press-On Wire Connector, 1-2 Port, 250V 32A, 10–28AWG

OVERVIEW

The E-CON-P-12 is a 1-2 port press-on wire connector designed for fast, tool-free terminations in commercial and industrial wiring applications. The push-in spring mechanism accepts both soft and hard conductors, making it suitable for branch circuit connections, fixture wiring, and panel terminations where reliable, compact splices are required.

Rated at 250V and 32A, the connector accepts soft wire from 24AWG to 10AWG and hard wire from 24AWG to 12AWG (0.08–4mm²). The housing is constructed from polycarbonate (PC) with a nickel-chromium alloy steel spring contact. Operating temperature range is -40°C to +105°C. Recommended strip length is 8–12mm.

SPECIFICATIONS

Input voltage	250 V	Operating temp	-40 to +105 °C
Current Rating A	32 A
