

## Press-On Wire Connector, 2–10 Port, 400V 32A, 28–10 AWG

### OVERVIEW

The E-CON-P-210 is a press-on wire connector supporting 2 to 10 ports, designed for fast, tool-free electrical connections in commercial and industrial wiring applications. It is suited for junction and distribution points where multiple conductors must be terminated reliably without crimping or screw-down hardware.

The connector is rated for 400V and 32A, with an input wire range of 20–10 AWG (0.5–6 mm<sup>2</sup>) and an output wire range of 28–12 AWG (0.5–4 mm<sup>2</sup>). The housing is constructed from polycarbonate (PC), and the internal spring contact is nickel-chromium alloy steel. The unit operates across an ambient temperature range of -40°C to +105°C. Stripped wire length for termination is 8–12 mm.
