

Press-On Wire Connector, 2–4 Port, 400V 32A, 10–28 AWG Input/Output

OVERVIEW

The E-CON-P-24 is a 2–4 port press-on wire connector designed for fast, tool-free terminations in commercial and industrial wiring applications. Its spring-clamp mechanism accepts a range of conductor sizes, making it suitable for branch circuit connections, fixture wiring, and panel distribution work.

The connector is rated for 400V and 32A continuous load. Input conductors range from 20–10 AWG (0.5–6mm²) and output conductors from 28–12 AWG (0.5–4mm²). The polycarbonate housing and nickel-chromium alloy steel spring contacts support an operating temperature range of -40°C to +105°C. Recommended strip length is 8–12mm.

No certifications are confirmed in available source data. Consult project specifications and local code requirements before installation.

SPECIFICATIONS

Input voltage	400 V	Operating temp	-40 to +105 °C
Current Rating A	32 A
