

Press-On Wire Connector, 400V 32A, 2–8 Port, 28–10 AWG Input/Output

OVERVIEW

The E-CON-P-28 is a 2–8 port press-on wire connector designed for fast, tool-free electrical connections in commercial and industrial wiring applications. It accepts input conductors from 20–10 AWG (0.5–6 mm²) and output conductors from 28–12 AWG (0.5–4 mm²), making it suitable for branching circuits in panel wiring, fixture installations, and control enclosures.

The connector is rated for 400V and 32A, with a polycarbonate housing and nickel-chromium alloy steel springs for reliable contact retention. It operates across an ambient temperature range of -40°C to +105°C. Recommended strip length is 8–12 mm per conductor.

No certifications are confirmed in the available source data. Consult your local code authority for compliance requirements prior to installation.

SPECIFICATIONS

Input voltage	400 V	Operating temp	-40 to +105 °C
Current Rating A	32 A
