

4-Port Press-On Wire Connector, #18–12 AWG, 250V 32A, -40°F to 221°F

OVERVIEW

The E-CON-P-4P is a 4-port press-on wire connector designed for fast, tool-free electrical connections in commercial and industrial wiring applications. It accommodates wire sizes from #18 to #12 AWG and is suited for branch circuit splicing, fixture wiring, and panel feed applications where a compact, reliable termination is required.

The connector is rated for 250V and 32A with a wire strip length of 12–13mm. The PA housing is rated for operation from -40°F to 221°F, making it suitable for use in both indoor and outdoor installations subject to temperature extremes. The metal contact components are constructed of brass with a steel spring mechanism.

No certifications are confirmed in the available source data. Verify compliance requirements with your local authority having jurisdiction prior to installation.

SPECIFICATIONS

Input voltage	250V V	Operating temp	-40 to +85 °C
