

## DC 5.5x2.1mm Female Jack Pigtail Cable, 20 AWG, 42 In.

### OVERVIEW

The E-DC-J5.5-42 is a DC 5.5x2.1mm female jack pigtail cable designed for connecting LED drivers, power supplies, and other DC-powered equipment to downstream devices or distribution points. The 20 AWG stranded wire and pre-tinned leads simplify termination in panel, junction box, or open-wire installations.

The cable measures 110 cm (approximately 42 in.) in length with a 3.5 mm outer diameter. Conductors are stripped 1 cm and tinned 3 mm at the ends, providing clean, solder-ready terminations. The 20 AWG gauge is suited for low-voltage DC circuits typical of LED lighting control and power distribution applications.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this cable assembly. Specifiers should verify suitability for their jurisdiction's wiring requirements prior to installation.
